

Eva Piskun

(561) 419-1719 | [Email](#) | [LinkedIn](#) | [GitHub](#) | New York, NY

EDUCATION

New York University

Bachelor of Arts in Computer Science

- Activities: Tech@NYU, Product Management Club (PMC), Women in Computing (WiC), Girls Who Code

New York, NY

Aug. 2025 – May 2029

EXPERIENCE

Software Development Intern

May 2026 – Present

EBMG Property Management

New York, NY

- Shipped **Virtual Manager RAG** using Claude Sonnet + pgvector (**84 docs / 1,897 chunks**) to answer building-specific queries with per-building **RLS** isolation, role-scoped retrieval, and free fallback via OpenRouter
- Built **5 full-stack modules** (work orders, deliveries, shift swaps, vendor check-in, smart search) across **48 pages** powering day-to-day operations across a **15+ building** portfolio with Resend notifications
- Resolved **38-issue** security audit — hardened **ES256 JWT**, pinned **12** security-definer functions, tightened **RLS** storage policies, implemented **48+** protected routes with **RBAC**, and achieved **30/30** Playwright test coverage
- Migrated **2 codebases** and **70+ documents** off Base44 to **Supabase** via Python scripts; built async **NYC property scraper** (PLUTO/HPD/ACRIS) with incremental refresh, schema validation, and Socrata support

Full Stack Product Engineer

Apr. 2026 – Present

The Modern Mat Method | [modernmatmethod.com](#)

Remote

- Sole engineer on a community platform and paywall-gated video hub across **7 campuses**, waitlist of **50+**
- Engineered end-to-end **Stripe** subscription system — checkout, promo codes, post-payment redemption, founding member cap (**150 seats**), cancellation flow, customer portal, and **TDD** webhook + paywall test suite
- Shipped **AI** workout builder (OpenAI) and **14** Supabase Edge Functions powering auth, video, and payments
- Designed **15-tab** admin dashboard with **4-tier RBAC**, **RLS** policies, instructor hub, and **CSP** security headers
- Implemented **3D** scroll-locked mat animation via **Spline** + **RAF** loop with bundle splitting and **ADA** compliance

South Florida Regional President & Founder, BBGs in STEM

May 2024 – May 2025

BBYO

Davie, FL

- Led a region of **1,000+ members**, training **17 chapter leaders** and driving measurable retention improvements
- Founded an international girls-in-STEM chapter, recruited **30+ members** and led weekly global discussions on AI

Datadog DataPUPS Summit | *Early Recruiting Program — 30 accepted / 1,000+ applicants*

Jun. 2026

PROJECTS

enerME | *React, TypeScript, FastAPI, Prophet, Supabase, Tailwind CSS*

- 2nd place** at Ruth AI Hackathon (Hearst Lab, NYC) — selected from **150+ applicants**
- Ingested and queried **2M+ rows** of household power data from Supabase with resumable pagination
- Developed **FastAPI** backend with **Prophet** forecasting: 7-day hourly predictions with confidence bands
- Classified energy spikes by impact severity (low/medium/high) to dynamically drive tone of AI-generated insights

Juno | *React, TypeScript, MediaPipe, ElevenLabs, Tailwind CSS, Vercel*

- Overall winner** at Girls Into VC VibeHack: Health x AI Hackathon (NY Tech Week) — team of 5
- Engineered **MediaPipe Pose** pipeline tracking **33 landmarks** per frame for real-time joint angle detection
- Integrated **ElevenLabs** TTS + Scribe for hands-free spoken coaching cues and mid-workout voice Q&A

Be1 Space | *Next.js, FastAPI, Supabase, Railway, JWT*

- Selected into **Tech@NYU Tech Treks** — **19 accepted / 300+ applicants**
- Built **FastAPI** backend with **JWT** auth, NYU email gating, and **Supabase** RLS policies
- Deployed frontend and backend to **Railway** via Nixpacks with environment-variable-driven config

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js, FastAPI, Flask, Tailwind CSS, shadcn/ui, Framer Motion, Radix UI, GSAP

Developer Tools & Platforms: Git, GitHub, Vercel, Railway, Docker, Mux, Stripe, OpenRouter, Cursor, Claude Code

Databases: PostgreSQL, Supabase, pgvector, SQL

AI & ML: OpenAI API, Anthropic Claude API, Retrieval-Augmented Generation (RAG), Prophet

Spoken Languages: English (Native), Russian (Fluent), Spanish (Novice)
